

## RCK-VRT

### Vertical Cable Rack Support

**Thin 2.75" Profile**

**Stackable Design**

**Rounded Waterfall drop off for cable support**

**Extra Durable Powder Coated Finish**

**Stackable design for full or half rack height**

Part Number: **RCK-VRT**

Description: Vertical Cable support for in-between racks

Clark Wire & Cable's RCK-VRT Vertical Rack system is designed to support cable connections in the truck bay or other locations where management and support are required. The heavy duty powder coated design prevents rust and corrosion while the sloped supports are designed to ease the bend radius for a natural curve to the cables. Each 4' section has three waterfall dropoffs for a total of six when stacked to a full 8' rack height.
