The RCC-HD series cables are hybrid audio and video cables designed for remote broadcast, staging and production environments. Each video element is a CD7506 low-loss 18AWG RG6 coax cable that meets or exceeds SMPTE ST2081-1 and ST2082 standards for ultra high-definition digital video formats. The audio elements are made from Clark's SPA22GS low-loss 22AWG single-pair cables. Each audio and video element is uniquely color coded for quick identification. The outer jacket is extruded from a TPE compound that is extra-flexible, rugged and abrasion resistant.

See CD7559 specifications for additional coax attenuation specifications and HD/SDI transmission distances.
